

COLORS

Short version for a vendor: **Iron Black on Bone, Rust as the pop color.**

FONTS

FRONTIER

Display face. Big headings and the word MUSTANG only — never body text.

GREICKO

Short labels, buttons, "LAND & BRUSH". All-caps face — use in small doses.

System Sans

Everything else. Body copy is always a clean sans, normal case.

Both brand fonts are licensed — files supplied on request, don't redistribute.

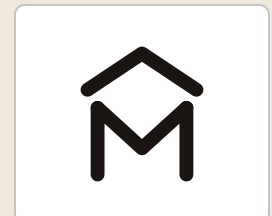

LOGOS

Main lockup — light backgrounds

Dark backgrounds

Rafter M mark — tight spots

- Give the logo breathing room; don't crowd it, stretch it, or recolor it.
- Dark art on light backgrounds; Bone art on dark. Never the dark lockup on a dark ground.
- The Rafter M alone works for profile pictures, embroidery, and small print.
- Print vector: "Logo - Vector (print quality).svg" in this folder.
